

ASX QUARTERLY REPORT FOR PERIOD ENDED 30TH SEPTEMBER 2014

Mt Thirsty Project

No work was carried out on the Mt Thirsty Joint Venture project during the quarter. Discussions with the joint venture partner in relation to a possible merging of joint venture interests have, to date, still not achieved agreement on the possible terms or mechanics.

The Directors are continuing to work on various options to advance the Mt Thirsty project as well as seeking other opportunities.

Mt Thirsty Project Summary

The Mt Thirsty Cobalt – Nickel - Manganese oxide project covering an area of 11.5km² is located 20km north-northwest of Norseman in the southern goldfields of Western Australia, a well-endowed nickel terrain (see Figure 1). Conico Ltd through its wholly owned subsidiary Meteore Metals Pty Ltd owns 50% of the project in joint venture with Barra Resources Limited. The Mt Thirsty deposit has the potential to emerge as a significant cobalt supplier. Recent metallurgical test work indicates that high recoveries of cobalt together with some nickel can be achieved through low temperature agitated leaching in closed tanks using SO₂.

Mt Thirsty has a JORC (2004) compliant Indicated Resource of 16.6 million tonnes at 0.14% Cobalt, 0.60% Nickel and 0.98% Manganese and a JORC (2004) compliant Inferred Resource of 15.3 million tonnes at 0.11% Co, 0.51% Ni and 0.73% Mn over a length of 1.6 kilometres and a width of up to 850 metres. (This resource information was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported, refer ASX Announcement 8th March 2011: “Resource Upgrade”, available to view on www.conico.com.au).

As well as the Co-Ni oxide resource, the Mt Thirsty joint venture tenements have potential for nickel sulphide mineralisation at greater depths within the same ultramafic sequence which hosts the near surface oxide deposit. Intersections of nickel sulphides up to 6m down hole at 3.4% Ni were made by the joint venture in 2010 (refer ASX announcement 19th May 2010: “High Grades Intersected at Mt Thirsty”, available to view on www.conico.com.au).
